End-of-Month Analytics Report

Report Title:
Q3 Marketing Performance Analytics Report

Client:
Tech Savvy Solutions

Prepared by:
Precious Onyedum

Role:
Junior Data Analyst

Date Submitted:
(06-07-2026)

Executive Summary

The Q3 Marketing Performance Analysis Report evaluates the effectiveness of Tech Savvy Solutions' digital marketing campaigns between July and September 2024. During the quarter, the company generated **₦68.77 million** in revenue, achieved an **average ROI of 471.03%**, and recorded an **overall conversion rate of 22.93%**, demonstrating strong marketing profitability. July was the best-performing month, while revenue and lead generation declined in August and September. Further analysis showed a weak positive relationship between advertising spend and lead generation, indicating that campaign quality and targeting also influence performance. Based on campaign segmentation, competitor benchmarking, and Q4 revenue projections, increasing investment in high-performing campaigns while optimizing underperforming channels is recommended to improve future marketing performance.

KPI Dashboard Snapshot

KPI	Value
Average ROI	471.03%
Overall Conversion Rate	22.93%
Cost Per Lead (CPL)	₦1,436
Click - Through Rate (CTR)	2.25%
Revenue Growth (Sep vs Aug	-9.70%

Campaign Performance

Top 5 Campaigns

Business Question:

Which campaigns generated the highest return on investment during Q3, and which campaigns should receive increased attention or budget allocation in Q4.

Top 5 ROI Campaigns	
Row Labels	**Average of ROI (%) Recalculated**
Referral Programme	3100%
Email Segmented - VIP	2229%
Twitter/X Campaign	805%
End-of-Quarter Blast	700%
Display Ads - Q3	668%

Business Interpretation

- **Referral Program** delivered exceptional ROI because it generated high revenue with minimal advertising spend.
- **Email Segmented – VIP** also performed exceptionally well, suggesting targeted campaigns were highly effective.
- **Twitter/x Campaigns, End-of-Quarter Blast and Display Ads** consistently generated strong returns.

These campaigns generated significant returns relative to their investment and provide useful examples of successful targeting and marketing strategies.

Recommendation

Increase investment in the highest-performing campaigns while analyzing their audience, messaging, and channel strategy to replicate successful approaches across future campaigns.

Bottom 3 Campaigns

Business Question:

Which campaigns generated the lowest return on investment, and what improvements are needed before continuing investment?

Bottom 3 ROI Campaigns	
Row Labels	**Max of ROI (%) Recalculated**
End of Q3 Social	-100%
Linkedln B2B Push	0%
SEO Content Push	0%
WhatsApp Campaign	0%

Business Interpretation

The lowest-performing campaigns (End of Q3 Social, Linkedln B2B Push, SEO Content Push, and WhatsApp Campaign) recorded weak or zero ROI performance of -100% and 0% respectively, indicating that they generated no measurable return on marketing investment during the analysis period. Due to a tie between campaigns with the same ROI value, four campaigns were included in the analysis.

Recommendation

The lowest-performing campaigns generated little or no return on advertising spend and should be reviewed before additional investment is made. Consider adjusting audience targeting, campaign creatives, or marketing channels. Campaigns that continue to show weak performance should be paused and resources redirected toward higher-performing campaigns.

Channel Analysis

Business Question:

Which marketing channels generated the highest revenue and the strongest return on investment during Q3?

Channel Performance by Revenue and ROI

Row Labels	Sum of Revenue (NGN)	Average of ROI (%) Recalculated
Paid Ads	₦17,630,000	287%
Social Media	₦9,100,000	256%
Email	₦8,580,000	754%
Display	₦8,240,000	537%
Referral	₦8,000,000	3100%
Organic	₦4,800,000	0%
Video Ads	₦4,590,000	395%
Influencer	₦3,880,000	547%
Affiliate	₦1,830,000	382%
Audio Ads	₦1,400,000	99%
Messaging	₦720,000	0%
Grand Total	**₦68,770,000**	**471%**

Channel Performance Analysis

Paid Ads generated the highest revenue during Q3, contributing **₦17.63 million**, making it the strongest revenue-driving channel. It also achieved a positive average ROI of **287%**, showing that the channel generated substantial returns from marketing investment.

Social Media ranked second in revenue generation with **₦9.10 million** and achieved an average ROI of **256%**, indicating strong customer engagement and effective campaign performance.

Referral recorded the highest average ROI at **3,100%**, despite generating lower revenue compared to Paid Ads. This suggests that Referral campaigns were highly efficient and generated significant returns relative to their campaign costs.

Email and Display channels also performed strongly, generating **₦8.58 million** and **₦8.24 million** in revenue respectively, with high ROI values of **754%** and **537%**. These channels demonstrate opportunities for further optimization and possible scaling.

Lower-performing channels such as Organic and Messaging recorded limited revenue contribution and lower ROI performance, suggesting the need for further review of campaign strategy, audience targeting, and resource allocation.

Recommendation

Tech Savvy Solutions should continue scaling **Paid Ads** because it is the highest revenue-generating channel. However, the company should also consider increasing focus on highly efficient channels such as **Referral, Email, and Display**, which achieved stronger ROI performance.

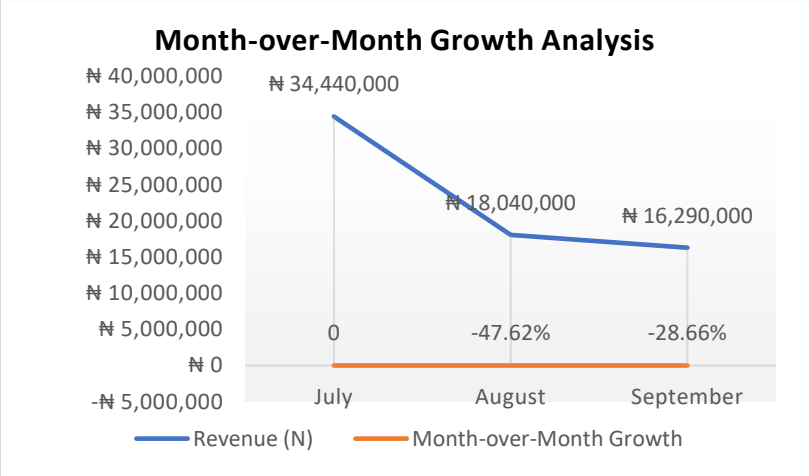

Lower-performing channels should be reviewed to identify whether improvements in targeting, content strategy, or campaign execution can increase returns. If performance remains low, resources should be redirected toward channels with stronger revenue and ROI potential.

Month-over-Month Growth

Business Question:

How much did performance grow or decline from one month to another?

Month	Revenue (N)	Month-over-Month Growth
July	34440000	-
August	18040000	-47.62%
September	16290000	-28.66%

Month-over Month Analysis

Revenue performance declined throughout Q3. July recorded the highest revenue at **₦34.44 million**, but revenue decreased by **47.62% in August**. September experienced a further decline of **9.70%**, indicating continued reduction in campaign performance during the quarter.

The decline suggests that marketing strategies that contributed to July's strong performance should be reviewed and replicated. Campaign timing, audience targeting, and budget allocation should be analyzed before Q4 planning.

Recommendation

Tech Savvy Solutions should investigate the factors behind the decline after July and optimize campaign strategies for Q4. High-performing campaigns from July should be reviewed to identify successful approaches that can be scaled, while underperforming campaigns should be adjusted or discontinued.

Q4 Revenue Projections

Business Question:

Based on Q3 performance, what revenue can Tech Savvy Solutions expect in Q4 if current trends continue?

Q4 Revenue Projection

Month	Revenue (N)	Status
July	₦ 34,440,000	Actual
August	₦ 18,040,000	Actual
September	₦ 16,290,000	Actual
October	₦ 11,621,309	Forecast
Novermber	₦ 8,290,659	Forecast
December	₦ 5,914,568	Forecast

Growth Rate Assumption

Growth Rate	Result
August Growth Rate	-47.62%
September Growth Ra	-9.70%
Average Growth Rate	-28.66%

Assumption

This projection assumes that the average monthly growth rate observed during Q3 continues into Q4 and that no significant market, economic, or operational changes occur during the forecast period.

Revenue Projection Analysis

Revenue showed a declining trend throughout Q3, with the largest decline occurring between July and August. Based on the average monthly decline of **28.66%**, the Q4 projection estimates that revenue may continue decreasing if current trends remain unchanged.

The forecast highlights the need for Tech Savvy Solutions to review campaign performance, improve targeting strategies, and focus investment on high-performing campaigns before Q4.

Recommendation

To reverse the projected decline, Tech Savvy Solutions should increase investment in high-performing campaigns, optimize average-performing campaigns through improved targeting and creative strategies, and review or discontinue low-performing campaigns. Continuous monitoring of campaign performance and budget allocation will be essential to improving revenue growth in Q4.

Strategic Recommendations

“3 actionable recommendations for Linda's Q4 strategy"

Linda should prioritize:

1. **Scaling High-Performing Campaigns and Channels.**

Based on Q3 performance, Tech Savvy Solutions should increase investment in high-performing campaigns and channels that consistently generated strong returns. Paid Ads generated the highest revenue (**₦17.63 million**), while Referral and Email campaigns recorded strong ROI performance. Additional budget should be allocated strategically to these areas to maximize returns during Q4.

Action: Increase budget allocation for proven high-performing campaigns while monitoring ROI to maintain efficiency.

2. **Optimize Underperforming Campaigns and Improve Targeting**

The Q3 analysis identified campaigns and channels with lower revenue contribution and weaker performance. Instead of continuing the same approach, these campaigns should be reviewed to identify issues related to audience targeting, campaign messaging, and creative effectiveness.

Action: Conduct a performance review of low-performing campaigns and either optimize them or redirect resources to better-performing opportunities.

3. **Improve Reporting Efficiency Through Automated Tracking**

Currently, campaign analysis requires manual data cleaning, calculations, and dashboard updates. To speed up reporting, Tech Savvy Solutions should introduce a more structured reporting process using automated dashboards and standardized data templates.

Action: Create a reusable reporting dashboard that automatically tracks key KPIs such as revenue, ROI, conversion rate, and campaign performance.

Appendix

Column Name	Data Type	Description	Expected Format/Values	Data Quality Notes
Campaign_ ID	Text	Unique identifier for each campaign	C001, C002, C003, C004, etc.	Duplicate IDs were removed during cleaning
Campaign_ Name	Text	Name of the marketing campaign	Free text	No major issues found
Channel	Text	Marketing channel used	Email, Paid Ads, Social Media, Referral, etc.	Standarized where necessary
Start_Date	Date	Campaign launch date	YYYY-MM-DD	Date format standaridized
End_Date	Date	Campaign completion date	YYYY-MM-DD	One missing End_Date left blank for active/running campaign
Ad_Spend (NGN)	Number	Amount spent on campaign	Currency/Numbers	N/A and blank values replaced with 0
Impression s	Number	Numbers of times campaign was viewed	Whole numbers	One missing value retained and documented
Clicks	Number	Numbers of clicks generated	Whole numbers	No major issues found
Leads	Number	Numbers of leads generated	Whole numbers	No major issues found
Conversion s	Number	Numbers of successful conversions	Whole numbers	No major issues found
Revenue (NGN)	Number	Revenue generated by campaign	Currency/Numbers	Invalid "-" value replaced with 0
ROI (%)	Percenta ge	Original ROI provided in source data	Numeric percentage	Missing values identified
ROI (%) Recalculate d	Percenta ge	ROI recalculated using Revenue and Ad Spend	Numeric percentage	ROI recalculated and division-by-zero errors handled
Region	Text	Geographic market targeted	Lagos, Abuja, Port Harcourt, Nationwide	One row required manual correction due to column shift
Campaign_ Status	Text	Current campaign status	Completed, Running, Pending	Standardized formatting
Account_ Manager	Text	Campaign owner/manager	Staff names	Missing values replaced with "Unknown - Pending Confirmation"

Folder Structure SOP

Folder	Sub_Folder	Contents
01_Raw_Data	-	Original unedited CSV and XLSX files
02_Clean_Data	-	Cleaned and validated versions of all datasets
03_Analysis	Summary_Stats	Summary statistics and KPI calculations
03_Analysis	Pivot_Tables	Pivot tables and exploratory analysis
04_Dashboards	Excel	Excel dashboard files (.xlsx)
04_Dashboards	Excel	Excel dashboard files
05_Reports	Weekly	Weekly performance reports
05_Reports	Monthly	Monthly management reports
06_Visuals	Charts	Charts used in reports and presentations
06_Visuals	Exports	Exported images and screenshots
07_Archive	-	Old versions and retired project files

Methodology Notes

Data Preparation

- Reviewed the raw marketing dataset for missing values, duplicates, and formatting issues.
- Standardised date formats and numerical fields.
- Created calculated fields including ROI, Conversion Rate, and Month.

Data Analysis

- Used Excel Pivot Tables to summarise campaign performance by channel and month.
- Calculated KPIs including total revenue, average ROI, conversion rate, and cost per lead.
- Performed trend analysis, correlation analysis, campaign segmentation, and revenue forecasting.

Visualisation

- Created dashboards and charts to communicate campaign performance trends and insights.
